Innovo COPILOT

AI Business Copilot for SAP Business One

Your Business. Your Data. Your AI Cockpit.

Ask questions in natural language. Get instant dashboards, analytics and predictions from SAP Business One — instantly.

THE PROBLEM

Business Data Shouldn't Be Complicated

- Too many ERP screens, filters and reports to navigate
- Dependence on technical users for every question
- SQL / HANA and report-writing skills required for simple answers
- Information scattered across disconnected reports
- Delayed decisions while reports are prepared manually
- No access to business data while away from the office

Innovo COPILOT makes your business data conversational.

- Ask instead of searching.
- Understand instead of waiting.
- Decide instead of guessing.

THE SOLUTION

Meet Your AI Business Copilot

Ask questions in natural language. Get instant business insights, analytics, dashboards and predictions — without complex reports, SQL or HANA queries or complicated configurations.

ASK

Ask what you need, in plain natural language.

ANALYZE

AI finds, analyzes and understands the data.

ACT

Get a clear answer to save, share or act on.

HOW IT WORKS

From Connection to Decision, in Four Steps

01

Connect

Securely connect Innovo COPILOT with SAP Business One.

02

Ask

"Which customers have the highest outstanding balances?"

03

Understand

AI analyzes the data and presents meaningful results.

04

Act

Save the result, share it, email it, or act on it.

NATURAL LANGUAGE AI

Talk to Your Business Data

No SQL. NO HAHA, No complicated reports. No technical expertise required.

What were our top five selling products this quarter?

Show customers with overdue payments above AED 100,000.

Which products have declining sales?

Compare this year's revenue with last year.

What is our current inventory value?

Show me outstanding receivables by customer.

FEATURES

Everything You Need, From One Intelligent Cockpit
