

Brief of BTP Cloud Modernization project

1,000+ interfaces and **400**+ business partners

AI-based invoice processing

\$200 K cost savings

Enhanced risks & controls monitoring

\$ 17M^ potential loss of revenue avoided

How we did it

What is it

Integration Suite

Single scalable, AI-assisted integration solution that helps unify, automate, and secure the business application landscape

Joule AI

SAP's AI assistant that transforms how we interact with SAP systems by making tasks smarter and faster. Also for decision-making in webenabled Fiori applications.

Work Zone

Enables a single point of access for SAP, custom apps, and third-party solutions.
Consolidating Fiori apps here, giving users one central launchpad for daily tasks

Process Automation and AI

Enables to quickly automate workflows and tasks to meet specific business requirements with pre-built content for faster deployment

Detailed analysis of existing landscape and designing solution and future-state architecture in line with IT&D strategy

Consolidated approximately interfaces for 3PLs, Partners, Customers, retiring legacy components

Phase wise roll-out of the application suite ensuring minimal business impact and near-zero downtime

Laid the foundation for future innovation across business functions and initiated pilot projects for AI and other digital capabilities

- 1000+ interfaces
- 400+ partner vendors

- Access real-time insights within apps
- Low-code/ no-code application development

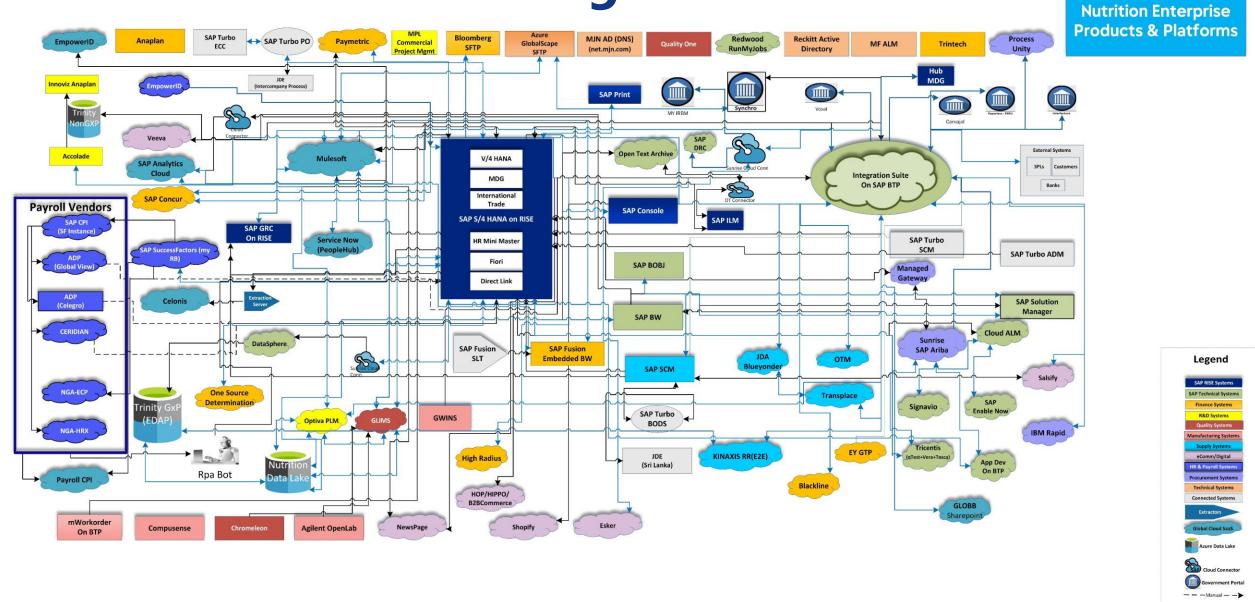

Unified place to access-

- Dashboards
- Work Items
- Transactions view

POC for Invoice processing-

- AI-based data extraction
- Manual approval workflow for exceptions

Envisioned Future Integration State

Thank you!
