

SAP S/4HANA GO-LIVE ANNOUNCEMENT

PROJECT BACKGROUND AND STRATEGIC SIGNIFICANCE

- Today marks a significant milestone in Malaysia Airports' digital transformation journey with the successful **GO-LIVE of the SAP S/4HANA system** — a major leap forward in our transition to a modern, cloud-based digital environment.
- This achievement represents one of the most complex and large-scale modernization initiatives, delivered within a remarkable timeline, involving the following:-

Migration from a **27-year-old** legacy SAP system **since 1998**

Migration of **23 Company Codes** and **5 SAP Modules**

Migration of over **12,000 system customisations**

Migration of more than **5 Terabyte data** across key enterprise business

More than **25 System Integration** between Internal and external parties

Extensive testing for more than **1,000++ Test Scenarios**

Engagement of **1,400++ SAP users** across the organisation

KEY OUTCOMES & VALUES

1

Embracing Transformation and Innovation - Enhancing service excellence and elevating the overall experience for our stakeholders.

2

Improved Performance and User Experience - The new platform runs on the SAP HANA database, delivering faster reporting, analytics, and data processing capabilities.

3

Enhanced Functionality - SAP S/4HANA introduces a simplified data model and updated features that foster innovation and enhance the overall user experience.

4

Future-Proofing - With SAP ending mainstream support for ECC systems by 2027, migrating now ensures we remain on a supported, secure, and future-ready platform.
